THE WORLD'S FINEST WOODCRAFTING TOOLS

Recd 2/24/76

LEICHTUNG INC

5187 MAYFIELD ROAD, CLEVELAND, OHIO 44124

WOODWORKING BENCH FROM DENMARK

MODEL 611*

The model 611 is the recognized work standard among professionals and dedicated amateur woodcraftsmen. Constructed throughout of first quality, solid Danish beech, the rare, long timbers are kiln dried, sanded, and then immersion-impregnated with raw linseed oil. The bench is then sealed with two coats of hard lacquer. These processes insure that manufacturing tolerances of .008 inches will be preserved throughout years of use. An occasional wiping with linseed oil is all the maintenance it will ever need.

The unique combination of a shoulder vise unimpeded by spindles, two full rows of rectangular slots and four dogs, plus a full width tail vise, allows this bench to hold virtually and size or shape of wood piece up to 72" long, in practically any position without the use of auxiliary clamps. The rectangular dogs will not rotate or slip and can hold items as large as a grandfather clock.

The tool well may be positioned either at the end of the bench or on the side opposite the shoulder vise, using the simple mounting hardware which is included. Brackets and screws for rigid floor mounting are also included.

The electrogalvanized spindles, rods, and dogs need only an occasional wiping with machine oil for a lifetime of trouble-free service.

Assembly instructions and a 16-page manual of uses and suggestions come with each bench.

** Prices of workbenches rise so rapidly that we cannot print them in our catalog (which lasts six months or more). For current prices on all benches, please refer to "VERY IMPORTANT PRICE MEMO".*

SPECIFICATIONS

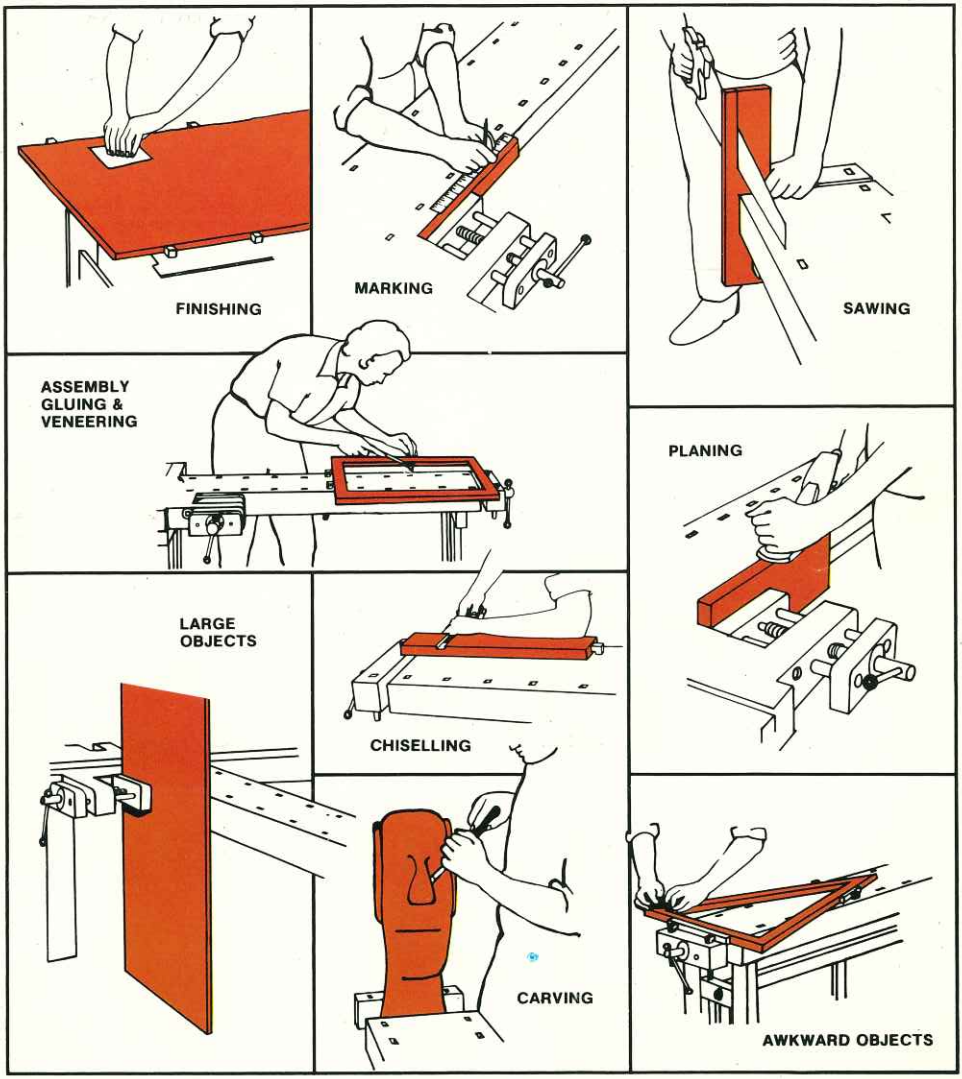
Length (vise closed but including tool well)	80"
Height	33"
Width of end with shoulder vise	36"
Width at end with tail vise	15¾"
Cpacity of bench dogs	72"
Tail vise capacity	6¼"
Shoulder vise capacity	10" x 6¼"
Space between bench slots	5¾"
Weight	174#

LERVAD

EXCLUSIVE LERVAD FOUR-POINT SURFACE-HOLD SYSTEM

Only Lervad, of all bench manufacturers, provides TWO full rows of rectangular bench slots and FOUR dogs. As craftsmen in their own right, they reason that since 95% of all workpieces are variations of a rectangle, a four-point surface hold is superior to the usual two-point system. A simple concept, brilliantly executed! All three Lervad benches, models 610, 611, and 6200, feature the four-point hold system.

Shown below are only a few of the many ways this remarkable bench can be used. (From "How To Use Your Lervad Bench" supplied with models 610 and 611.)



WOODWORKING BENCH FROM DENMARK

MODEL 610*

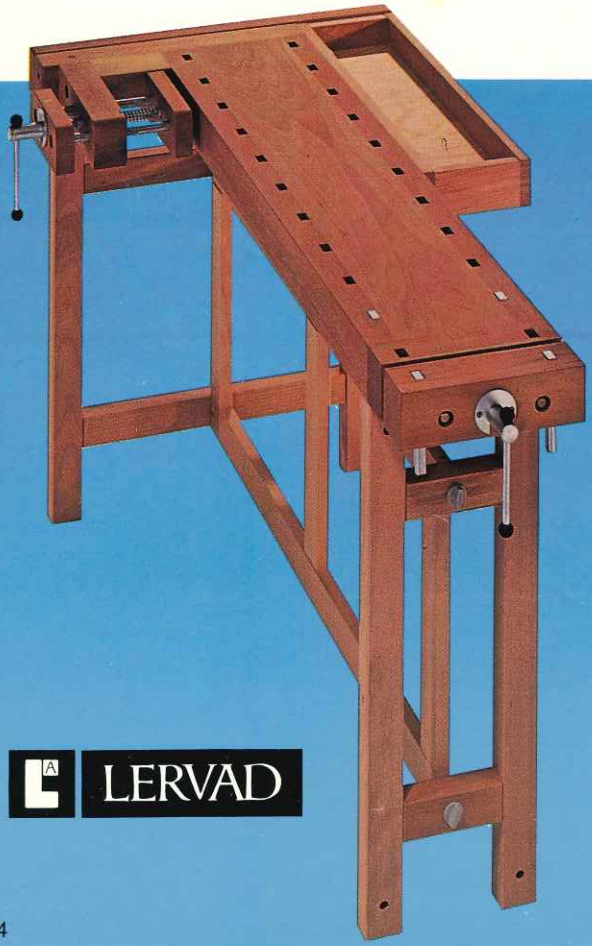
Smaller version of the 611 shown on page 2, but with an important additional feature: the top lifts off its steel locating dowels and the underframe's fittings may be loosened permitting it to be folded for easy storage. This feature, plus the smaller size, is popular both with craftsmen out on a job and hobbyists with limited space.

Assembly instructions and a 16-page manual explaining the many uses of this remarkable bench are included.

** Prices of workbenches rise so rapidly that we cannot print them in our catalog (which lasts six months or more). For current prices on all benches, please refer to "VERY IMPORTANT PRICE MEMO".*

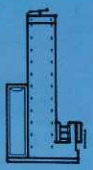
SPECIFICATIONS

Length (vise closed but including tool well)	60"
Height	32¼"
Width of end with shoulder vise	27"
Width at end with tail vise	10½"
Capacity of bench dogs	51"
Tail vise capacity	7"
Shoulder vise capacity	7" x 3½"
Space between bench slots	4½"
Weight	106#

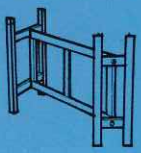


LERVAD

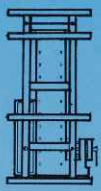
To fold the Levad 610 woodworking bench for storage:



1. *Lift the top from the underframe and lean against the wall.*



2. *Loosen the four plastic wingnuts which hold the leg frames to the centerframe. About 3/16" will permit the legs to be folded flat. Fold the legs.*



3. *Tighten wingnuts. The underframe will not remain flat during storage or when being moved.*

HOBITEK WOODWORKING BENCH FROM DENMARK

Hobitek

MODEL 150-S*

This highly functional bench has been used for centuries by Danish craftsmen. The model 150-S features a full length tool well, five drawers, a roomy cabinet for the storage of tools, parts, and work in progress. Extra rugged construction throughout.

The top, constructed of solid Danish beech, is 3⅛" thick, sanded to precision tolerances, and sealed with raw linseed oil.

The drawer frames are also of solid hardwood with Finnish plywood fronts and bottoms rabbeted into the frame. The tail vise is a masterpiece of joinery, meticulously constructed of massive beech parts controlled by a tool steel spindle and two steel rods instead of the Swedish style pine slides.

The shoulder vise, for horizontal holding, is made from a single block of beech 14" wide. This vise jaw is controlled by a spindle and two guide rods, also of high quality machine steel.

A single row of 12 rectangular bench dog holes accommodates two massive, spring-loaded steel dogs for surface holding. Predrilled holes in the trestle and heavy bolts allow you to easily secure the bench to the floor.

The trestle legs and the entire frame are of solid Danish beech. The vise handles are comfortably large. Instructions for setup are included. All in all, an excellent choice for the hobbyist, carver, and do-it-yourselfer.

** Prices of workbenches rise so rapidly that we cannot print them in our catalog (which lasts six months or more). For current prices on all benches, please refer to "VERY IMPORTANT PRICE MEMO".*

SPECIFICATIONS

Total length (vise closed)	59"
Height	35"
Width at shoulder vise (closed)	20⅝"
Width at tail vise	18"
Weight	110# net
Drawers	14¾" W x 3½" H x 10⅝" D
Cabinet	Provided with steel lock

DANISH HANDYMAN'S BENCH

MODEL 125-B*

The top is solid, kiln dried Danish beech. It is planed and sanded, then the whole top is totally immersed in raw linseed oil to seal the wood. These processes insure warp resistance through years of hard use. An occasional wiping with linseed oil will maintain this excellent condition.

A row of rectangular bench dog holes in the top and two rectangular bench dogs permit surface hold-down in a wide variety of positions. The tail vise provides the best possible horizontal hold. Used together, the dogs and tail vise will grip large panels, frames and other awkward items for sanding, gluing and other operations.

The vertical hold shoulder vise is designed so the jaws are unimpeded by the spindle. It holds timbers of any length in a vertical position with free access to three sides. Excellent for end planing.

Legs are of hardwood and can be bolted to the floor for greater stability. Spindles and rods are of high grade machine steel. Simple setup instructions are provided.

**Prices of workbenches rise so rapidly that we cannot print them in our catalog (which lasts six months or more). For current prices on all benches please refer to "VERY IMPORTANT PRICE MEMO".*

SPECIFICATIONS:

Overall length	49"
Overall width	26½"
Height	33"
Opening of front vise	5"
Opening of tail vise	6½"
Space between bench slots	4¼"
Weight	66#

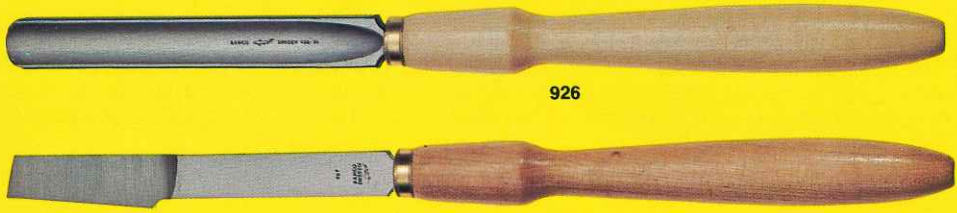
WOOD-TURNING TOOLS

Many of the ancient woodturning tools brought to America by craftsmen who emigrated from Sweden in the 1800's are still in use. We have seen such sets.

On a recent trip to Sweden we sought out that maker in the small city of Enkōping and found the factory had been acquired by the world renowned Bahco Company which continues to produce these remarkable tools.

With the help of the Bahco people we selected the most wanted styles and sizes and brought back a quantity of each. Every chisel, honed and ready for use, is covered by our unconditional guarantee.



926

967-7/8"

Set B-800 - 8 piece turning tool set composed of one each 1/2" (925-1/2) and 3/4" (925-3/4) skew chisels for advanced work on straight grain wood; 3/8" (926-3/8), 1/2" (926-1/2), and 3/4" (926-3/4) round nose turning gouges for advanced course grain work on straight grain wood, 5/8" (964-5/8) double edge turning gouge for both straight and cross-grain wood; 1/2" (965-1/2) V-nose double-edge turning gouge for both straight and cross grain wood; 1/2" (966-1/2) round nose double-edge turning chisel for end grain wood. **Set - $79.95 FRT. PPD.**

INDIVIDUAL TOOLS

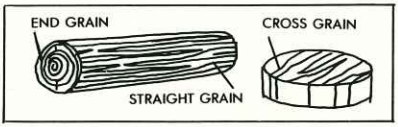
925-1/2 - $9.95 FRT. PPD.
925-3/4 - $10.95 FRT. PPD.
926-3/8 - $10.95 FRT. PPD.
926-1/2 - $11.95 FRT. PPD.
926-3/4 - $12.95 FRT. PPD.
964-5/8 - $13.95 FRT. PPD.
965-1/2 - $11.95 FRT. PPD.
966-1/2 - $11.95 FRT. PPD.

B-967-7/8" inside turning tool for end grain work - **$14.95 FRT. PPD.**

Set B-400 - 4 piece turning tool set composed of one each 964-3/8, 964-7/8, 965-7/8, and 966-7/8. These are additional sizes of some of the styles in the B-800 set, as the prefix numbers indicate. **Set - $41.95 FRT. PPD.**

INDIVIDUAL TOOLS

964-3/8 - $11.95 FRT. PPD.
964-7/8 - $13.95 FRT. PPD.
965-7/8 - $12.95 FRT. PPD.
966-7/8 - $12.95 FRT. PPD.



The easy-to-sharpen, long lasting, high carbon tapered Swedish steel blades, the knurled brass ferrule and the designed-for-comfort, 9 1/2" beech handles reduce chattering and flexing and help even the sometime craftsman produce fine work.

GENUINE ARKANSAS OILSTONES

No matter how good your cutting tools are, they'll need frequent whetting and occasional grinding. Quality tools require quality stones and there's no man-made stone in the world that can equal a natural Arkansas.

So, we went to the largest cutter of genuine Arkansas stones and had our selection made up to our specifications and packaged them in individual dustproof cedar boxes. Our stones are not only of the very finest quality, but they are attractively priced. (They have to be, our name is on them!) Remember, color of natural stones may vary but quality is consistent. There are four grades of Arkansas stones:

WASHITA - Most rapid cutting. Produces a keen edge, even though it is the coarsest of the four.

SOFT ARKANSAS - The best general purpose stone. Fast cutting; produces a very sharp edge.

WHITE HARD ARKANSAS - A superior stone for touching up and finishing an already sharp edge. Sharpening with our white hard Arkansas takes a little longer, but the truly polished edge is well worth it.

BLACK HARD ARKANSAS - The ultimate in finishing whetstones. This stone is the final step in producing high quality, surgical edges. Sharpening on a "black" takes quite a bit of time, because it only removes minute amounts of metal, but if you really want perfection in the edges you hone, the "black" is a necessity.

8" STONE SYSTEM

WTC-8 Washita Stone - approx. 8" x 2" x ½" in cedar box ..... **$11.95 FRT. PPD.**
STC-8 Soft Arkansas - approx. 8" x 2" x ½" in cedar box ..... **$14.95 FRT. PPD.**
BTC-8 Surgical Black Hard Arkansas - approx. 8" x 2" x ½" in cedar box ..... **$29.95 FRT. PPD.**

WSB-8 Set of all three of above stones, each in its own cedar box approx. 8" x 2" x ½", SAVE $6.90 ..... **$49.95 FRT. PPD.**

WSH-3 SET OF THREE ROUND EDGE SLIPS - Each stone 4" x 2" x ⅜" x ⅛", each in a plastic pouch. For sharpening gouges, carving and turning tools, and other curved surface tools. Contains one each of Washita, Soft Arkansas, and White Hard Arkansas slipstones ..... **$18.95 FRT. PPD.**

FH-5 FIVE PIECE ALL WHITE HARD ARKANSAS FILE SET - A necessity for razor edges on V parting tools and veiners. for carvers and turners. Used extensively by gunsmiths. Set contains one each (approx. 4" long) square, round, diamond, knife blade and triangular stones. Each stone packed in vinyl storage packet. ..... **$15.95 FRT. PPD.**

LGS-3 THREE-IN-ONE-SET - 6" STONES - One each Washita, Soft Arkansas, and White Hard Arkansas Stones. Each stone approx. 6" x 2" x ¼", permanently mounted on cedar block (with cedar dust cover). Overall length of cedar base is 22". A Superb Gift! ..... **$29.95 FRT. PPD.**

WP-1 SOFT ARKANSAS PADDLE STONE - For quick sharpening of any cutting tool in the shop or kitchen. Overall length 14". Stone (bonded to cedar paddle) is approx. 7" x 1½" x ¼". Rawhide thong. Packed in gift box. ..... **$7.95 FRT. PPD.**

HON-1 HONING OIL - Never use a sharpening stone without oil! This oil is specifically designed for use with Arkansas stones. 3 oz. ..... **$1.00 FRT. PPD.**

CARVER'S OR HOBBYIST BENCH

LERVAD

MODEL 6200

By Lervad of Denmark, this unique bench displays all the exceptional craftsmanship of the bigger 610 and 611 models. Constructed of solid Danish beech, the 6100 also includes the 4-point hold system, precision tail vise, and upper vise jaws inlaid with hornbeam for durability.

Only 30¾" high, 31½" long and 10½" wide, this bench is ideal for kit assembly, framing, and all kinds of hobbycraft. It may be permanently mounted to the floor or on 2" x 4" rails or plywood base for greater stability. Setup instructions included.

$129.00 FRT. PPD.

8 PIECE CHIP CARVING SET

HBR-8

These basic 8 pieces will make just about any kind of cut a whittler or chip carver would want. Hardwood handles are comfortably long - 5" to 6½". Blades of easy-to-sharpen special knife alloy will take and hold a razor edge.

$19.95 FRT. PPD.

CARVING TOOL ROLLS

When your tools are properly encased in these rolls, edges cannot be damaged by the metal of one tool touching the edge of another. These rolls are constructed of heavy, cotton knit-backed Naugahyde cinched by two web straps with saw-tooth buckles. Colors may vary.

CTR-12 holds 12 tools ..... **$5.95 FRT. PPD.**
CTR-18 holds 18 tools ..... **$8.95 FRT. PPD.**
CTR-24 holds 24 tools (shown) ..... **$11.95 FRT. PPD.**
CTR-36 holds 36 tools ..... **$17.95 FRT. PPD.**

LAYAWAY PLAN

If you wish to take advantage of today's low prices but would rather not strain your budget with a complete payment, we have a layaway plan to help you. It's simple:

1. Use the order form on the reverse side to order whatever you wish.
2. Send at least 25% of the total purchase price to us along with the completed order. (Minimum layaway order must be $100.00, in which case, for example, you would send at least $25.00 with your order.)
3. After your initial payment, send additional payments whenever it suits your budget. These will be applied against your purchase price. **THE ONLY STIPULATION IS THAT THE TOTAL BILL MUST BE PAID WITHIN 90 DAYS OF THE DATE YOUR ORDER WAS PLACED.** If not fully paid in 90 days, all payments will be returned to you and the order cancelled.

YOUR PURCHASES WILL BE SHIPPED WHEN YOU HAVE COMPLETED PAYMENT.

IF, FOR ANY REASON, YOU DECIDE TO CANCEL YOUR ORDER, YOU WILL RECEIVE A FULL REFUND OF ALL MONEY YOU HAVE PAID.

THERE IS NO CARRYING CHARGE.

BE SURE YOUR ORDER AND PAYMENT ARE ENCLOSED BEFORE SEALING ENVELOPE

OUR CUSTOMERS SAY . . .

"I received the Lervad workbench No. 611 about a week ago. I confess that I have never felt comfortable in ordering any item (particularly those carrying a price tag comparable to the 611) from printed materials only. I had concern about whether the bench could possibly meet the great expectations raised by the sales brochure.

I had absolutely no reason to worry. The bench far exceeds, both in appearance and in functional utilization, all claims made."

B. I. N., East Hartford, Connecticut

"I am writing to you because it isn't often that I purchase something that not only surpasses my expectations, but represents a level of thoughtfulness and craftsmanship almost non-existant today. I feel I've made a lifetime purchase that will not only assist me in making beautiful things but is a beautiful thing in itself."

M. G., New York, New York

"My 610 arrived today - it's beautiful!!"

I. W., Bronx, New York

Jointmaster

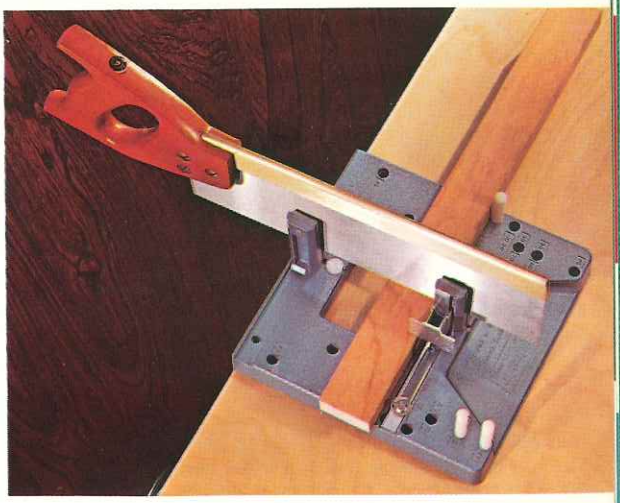
WINNER OF THE GOLD MEDAL '72 BRUSSELS INVENTOR'S FAIR

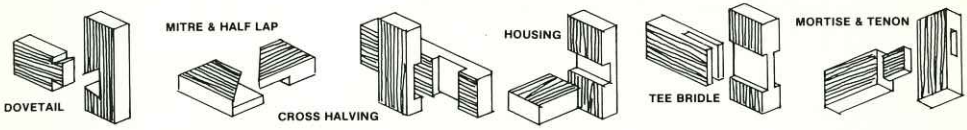
This unique invention makes perfect joints every time. The jig holds the wood and guides the saw to precision cuts which, once set up, can be repeated without further adjustment.

Cuts angles from 10° to 170°. Makes straight joints in up to 2" x 4" lumber and mitre joints in up to 2" x 2" wood. Makes tee, lap, tenon, dovetail and most other joints.

Fully portable, less than 9" x 9" square, Jointmaster can be set up anywhere. Comes with six dowels and a 20-page detailed instruction manual - plus our unconditional guarantee.

SS-80 JOINTMASTER
(saw not included)
$21.50 FRT. PPD.





TEAM YOUR JOINTMASTER WITH THE WORLD'S FINEST TENON SAW (BACKSAW)

The Spear & Jackson 12" x 15-point "Spearior" model is exactly right for making fine, clean cuts.

A 10" backsaw is really too short for efficient use with the Jointmaster, but this superb Spear & Jackson saw is perfect for that use as well as being an important adjunct to any woodworking craftsman's tool kit.

The heavy, solid brass back is 1" high and ¼" thick and has a deep satin finish. Three brass screws secure the blade to the comfortable, hard beech handle which is dowelled through the cross-grain to prevent splitting.

This perfectly balanced, taper-ground backsaw is made in Sheffield of highest quality chrome-vanadium steel which gives this saw the keenest, longest lasting edges.

An interesting fact of tool lore reveals that the finest saws come from Sweden - except tenon saws. For reasons unknown, Sheffield, England, produces the best tenon saws in the world - and this is one of them.

SJ1215 SPEAR & JACKSON 12" TENON SAW.....$17.95 FRT. PPD.

JOINTMASTER and S & J 12" TENON SAW together (save $4.45).....$35.00 FRT. PPD.

HAND FORGED CARVING TOOLS

A. PAFFOX - For over 100 years, Paffox has been hand-forging tools for the carvers of Europe. Solingen steel blades and octagonal hardwood handles average 10¼" in length overall. (Octagonal handles are a must for carving tools. Round handled tools tend to roll off your workbench . . . which beats heck out of carefully honed edges!) Which brings us to:

B. A Few Words About Sharpness: Like beauty, sharpness is in the eye of the beholder. To some it means that if you cannot actually shave with the tool, it isn't sharp. To others, it is a *good* edge which *feels* sharp, cuts smoothly, and *lasts*. Furthermore, each carver has his own preference for bevel and even that will vary with each tool shape! Compromise being the nature of life, we compromised . . . in your favor.

We selected the most skilled, experienced manufacturer we could find. We played on his pride and his German attention to minute details, and prevailed upon him to go several steps beyond any other manufacturer in the sharpening process. Yes, it does cost us more, but you'll get the sharpest, best finished edges commercially available.

Final honing, stropping, polishing etc., are left to you, the beholder. (See page 8 for the *natural* oilstones necessary to help you get that shaving edge.)

The set compositions correspond to the "shapes" shown on the bottom of the page. The "mm" numbers designate the widths (in millimeters). Thus, for example the first item in the B1200 is a straight chisel (shape 1) 6 mm wide. Item 3 in the B1200 set is a skew chisel (shape 2) 8 mm wide, etc. (To convert mm to inches, divide by 25.4. Thus, 6 mm = .236" (approx. ¼").

B1200 - 12 Piece Basic contains

Shape	1	1	2	5	7	7	8	8	9	12	39	40

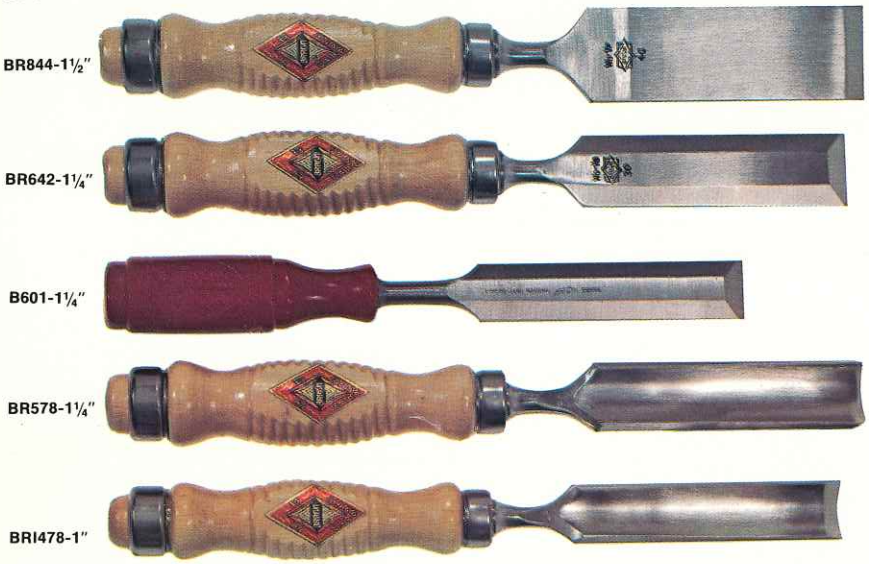
CHISELS AND GOUGES

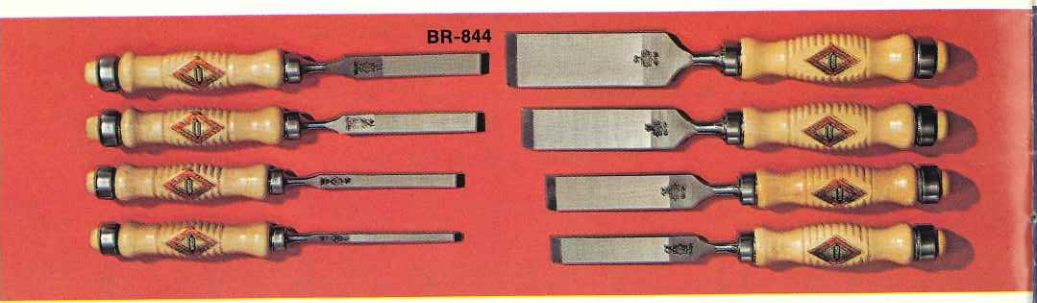
All of our Bracht chisels and gouges are fully ground and ready for final honing on Leichtung white or black hard Arkansas stones. See pages 8 & 9.



BR844 - 8 PIECE FIRMER CHISEL SET

These are really tough! Tungsten-Vanadium alloy steel (Rockwell C61-63) with the comfortable Bracht ribbed-ash handle and nickel-plated, double hoops. From 10-12½" in length (depending on blade size). Set contains: ¼", ⅜", ½", ⅝", ¾", 1", 1¼", and 1½" sizes.

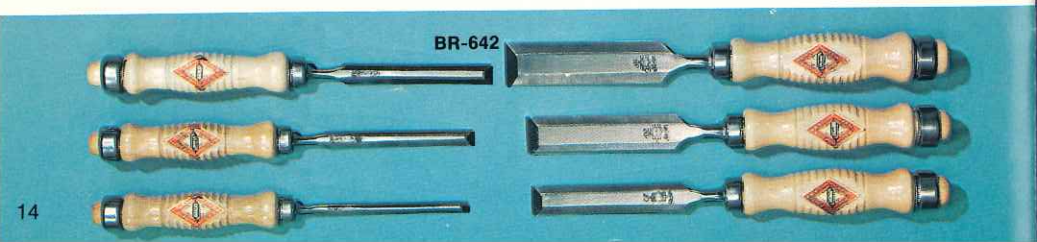
$47.95 FRT. PPD.



BR642 - 6 PIECE CABINETMAKERS' BENCH CHISEL SET

The same Tungsten-Vanadium alloy steel (Rockwell C61-63) and handles as in the Bracht firmer chisels. Very high quality bench chisels. From 10½" to 12" in length (depending on blade size). Complete with plastic hang-up edge guards. Set contains ¼", ⅜", ½", ¾", 1" and 1¼" sizes.

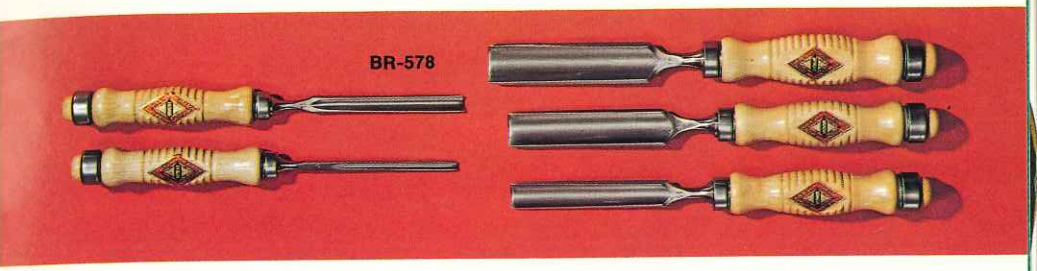
$34.95 FRT. PPD.



BR578 - 5 PIECE SET - SCULPTOR'S FIRMER GOUGES (MALLET TOOLS)

Bracht's very strong, heavy-duty gouges of Vanadium steel (Rockwell C59-62). Ribbed, ash handle is shaped for comfort. Nickel plated double hoops assure long handle life. (The German word for these hoops is "schlagring" which literally means "slam ring".) Overall length of 1" gouge is 11⅝". Set contains: ¼", ½", ¾", 1" and 1¼" sizes.

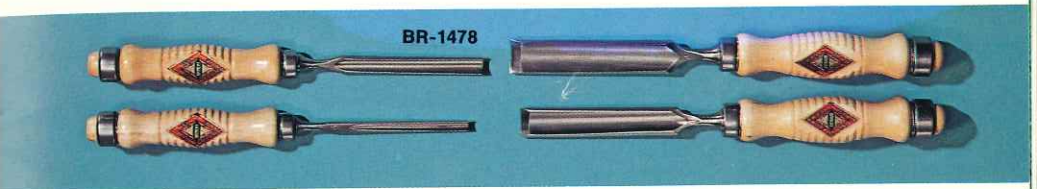
$29.95 FRT. PPD.



BRI478 - 4 PIECE SET - IN-CANNEL FIRMER GOUGES

Samé handle construction and steel as the BR578 except that the bevel is on the inside of the arc rather than on the outside. Designed for fine paring of surfaces or ends particularly to match irregular shapes. Set contains: ¼", ½", ¾" and 1" sizes.

$27.95 FRT. PPD.



B601 HANDSOME 6 PIECE BOXED BENCH CHISELS FROM BAHCO

Bahco's "Shark Brand" offers a gem of a bevelled edged chisel set. Top drawer Swedish steel, ground and honed for immediate use. The case (made from a single block of wood with a place for each chisel carefully routed out) is designed to keep the perfect edge harm-free from contact with dulling metal. "Sharks" hold their edges as much as three times longer than ordinary chisels. Handles of red, impact resistant plastic. Limited supply. Average chisel is 9½" long. Boxed set contains ¼", ⅜", ½", 1" and 1¼"sizes.

$59.95 FRT. PPD.

WOOD PLANES

"The only metal that should ever touch a fine piece of wood", insists our Danish master cabinetmaker, "is a carefully prepared cutting edge." He consequently looks with disdain at metal bodied planes.

He is, of course, absolutely right! Anyone who has used both kinds knows that wooden planes ride more smoothly over the work, are lighter weight, more sensitive to the touch, and allow greater cutting control. They do not clog up with shavings as easily as metal bodied planes.

Danish wooden planes are a joy to use and produce superior results. They come in a variety of styles for different uses - and each is itself a superb example of the art of joinery.

LJ-18 SCRUB PLANE - Red beech block, 9½" long with slightly convex 1¼" blade of Swedish steel. Used for "hogging" lots of wood quickly with short, cross-grain strokes. Metal striking knob for loosening wedge of tough, durable hornbeam.

$14.95 FRT. PPD.

LJ-27 SMOOTHING PLANE - Pearwood with hornbeam sole, 8¾" long with 2" Swedish steel blade. Has metal striking knob for loosening hornbeam wedge. Front horn and rear hand rest are also hornbeam. Use with the grain in long strokes after roughing out with scrub plane.

$17.95 FRT. PPD.

LJ-31 REFORM SMOOTHING PLANE - A toolmaking masterpiece! The red beech top is beautifully joined to white hornbeam base center with a sole of rock-hard lignum vitae whose natural oils lubricate the sole and make easy work of planing. Throat is adjustable to accommodate variable shaving thicknesses. This is particularly important to prevent tearing of grains when working with very hard or burl stocks. Gives final "glass" finish. 2" Swedish steel (A. E. Berg) blade on 8¾" body.

$34.95 FRT. PPD.

LJ-2 LONG JOINTER (TRYING) PLANE - Red beech top almost 24" long and 3¼" wide is joined to hornbeam sole. Swedish steel blade is 2½" wide. Handle is also hornbeam. As the name implies, the jointer is used for surface leveling preparatory to gluing up, and in general use for fine, flat finishes on longer surfaces and edges. Metal striking knob for loosening the hornbeam wedge is located in the top center of the block.

$29.95 FRT. PPD.

LJ-47 GROOVING PLANE - Red beech block with fruitwood top right shoulder. Lignum Vitae insert next to spur gives extra smoothness in right angle of rabbet. 9¾" long, 2¼" wide, 2⅞" high with 1½" iron. Width of rabbet can be accurately set up to 1⅛". Depth of rabbet may be set up to⅝". Adjustable tool-steel spur facilitates cross-grain rabbeting and may be raised for rabbeting with the grain. Cutting edge is set at on angle so that cut is smooth, even cross-grain.

$29.95 FRT. PPD.

LJ-40 RABBET PLANE - Hornbeam body block with lignum vitae sole. 9½" long with 1⅛" Swedish steel blade. For precision cutting with the grain only. Adjustable shoe in front of blade facilitates cutting very hard or burl wood, very much as with LJ-31 reform smoothing plane (above).

$24.95 FRT. PPD.

CABINETMAKERS' SCREWDRIVER SET

F-555

Set of 5 screwdrivers made specifically for wood screws (not machine screws). Turned oval handles of natural beech, with two coats of lacquer, are easy to grip and beautiful to behold. Specially melted carbon steel blades are flattened above to accommodate a wrench for extra torque, if necessary. Set consists of one each of the following sizes:

Blade Length and Point Size	Overall Length
3" x 1/4"	7"
4" x 5/16"	8 1/2"

HANDSAWS - BY SANDVIK - SWEDEN

European experts say that Sandvik is the best of handsaw makers. We are proud to present Sandvik's best: the 271 Guildmaster Series! Sandvik Swedish alloy steel is specially formulated for keen cutting quality and toughness. A unique method of hardening assures exceptional sharpness and blade flexibility.

Features: Ship point. Lightweight pattern. Straight back. High crown tooth line. Fully taper ground. Extra polished blade. Comfortable, laminated plywood handle with four nickel-plated brass screws. Specify your choice:

271-8 26" 8 point crosscut..... **$15.95 FRT. PPD.**
271-10 26" 10 point crosscut..... **$16.95 FRT. PPD.**
271-12 26" 12 point crosscut..... **$17.95 FRT. PPD.**
271-R 26" 5 1/2" point rip saw..... **$16.95 FRT. PPD.**

OLSEN HUNTING KNIVES

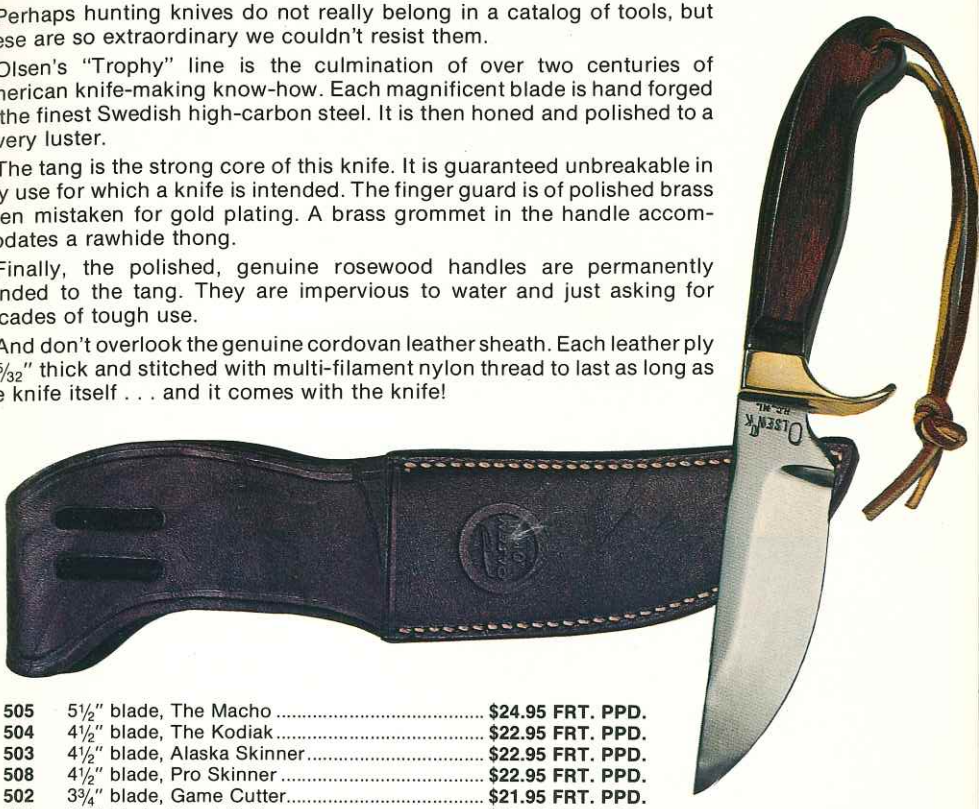
Perhaps hunting knives do not really belong in a catalog of tools, but these are so extraordinary we couldn't resist them.

Olsen's "Trophy" line is the culmination of over two centuries of American knife-making know-how. Each magnificent blade is hand forged of the finest Swedish high-carbon steel. It is then honed and polished to a silvery luster.

The tang is the strong core of this knife. It is guaranteed unbreakable in any use for which a knife is intended. The finger guard is of polished brass often mistaken for gold plating. A brass grommet in the handle accommodates a rawhide thong.

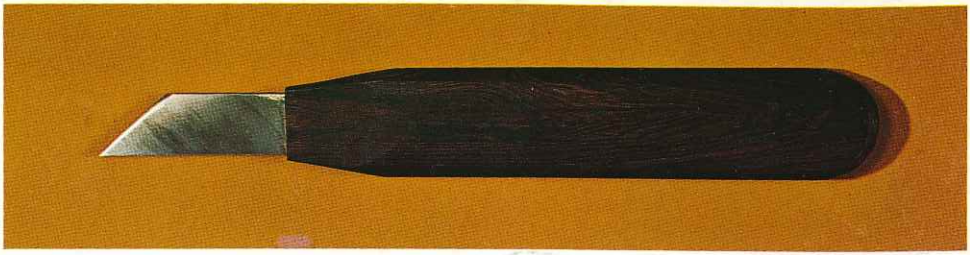
Finally, the polished, genuine rosewood handles are permanently bonded to the tang. They are impervious to water and just asking for decades of tough use.

And don't overlook the genuine cordovan leather sheath. Each leather ply is 5/32" thick and stitched with multi-filament nylon thread to last as long as the knife itself . . . and it comes with the knife!



505	5½" blade, The Macho	**$24.95 FRT. PPD.**
504	4½" blade, The Kodiak	**$22.95 FRT. PPD.**
503	4½" blade, Alaska Skinner	**$22.95 FRT. PPD.**
508	4½" blade, Pro Skinner	**$22.95 FRT. PPD.**
502	3¾" blade, Game Cutter	**$21.95 FRT. PPD.**
501	3½" blade, Trout Knife	**$19.95 FRT. PPD.**

Knife prices include sheath and rawhide thong



INSTRUMENT MAKER'S KNIFE

WL-1

Made of Tungsten Molybdenum hi-speed tool-steel (Rockwell C62-63) with a splendid, natural-finish rosewood handle. Hand made by Walter Lipton of Orford, New Hampshire . . . . . himself a fine guitar maker. The steel in this knife is so hard that Walter - (and you) can cut ebony or rosewood for hours without resharpening. The steel alone costs $6.00/lb. base price! Overall 8" long, 1⅛" wide and ⅜" thick. The blade itself is $^{11}/_{16}$" wide and $^{3}/_{32}$" thick. A knife you will treasure, if you whittle or carve. Quantities *severely* limited.

$13.95 FRT. PPD.

GUARANTEE

Our catalog is small because we insist on selling only the best. You will find no gimicky items or items which are readily available at good hardware stores. Our purpose is to offer the *extra*ordinary. If, after purchase, you are displeased (for whatever reason at all) return the item within 21 days for a full refund. We'd appreciate hearing your reason but it will have no bearing on your immediate refund.

SALES POLICIES

AVAILABILITY - We make every effort to keep all merchandise in stock in quantity. Nevertheless, the nature of some of our offerings is such that demand occasionally exceeds supply. You may expect delivery in from 3 to 4 weeks. Should there be a delay beyond our ordinary delivery time, you will be notified and given the option to wait a specified time or receive your money back.

CREDIT CARDS - You may charge your orders by BankAmericard or Master Charge. Minimum credit card charge is $15.00.

FREIGHT - All workbench prices are quoted FOB our Cleveland Warehouse.

1. Workbenches are shipped by truck, Freight Collect. Shipping charges usually cost about $15.00 to destinations east of the Rockies and about $20.00 to locations west of the Rockies. This figure may vary depending upon distance, accessibility, and rising freight costs.
2. We pay shipping charges on all tools, other than workbenches. We have no charts for mailing costs and no expensive or complicated add-ons.
